MOHAMMED FAHEEM P

BACKEND DEVELOPER

+91 7907603482 | faheempktl@gmail.com | faheem | fahi016 | Portfolio

SUMMARY

Backend oriented Computer Science undergraduate with hands-on experience in Java and Spring Boot, specializing in secure REST API design, JWT authentication, role-based authorization, and database driven backend systems. Skilled in designing scalable architectures, implementing service layer security, and developing practical applications as per enterprise backend standards.

SKILLS

Programming languages- Java(primary), C, C++, Python
Backend Technologies- SpringBoot, Spring MVC, Spring security, RESTful API development
Security & Authorization- JWT Authentication, Role-Based Access Control
Databases & ORM- MySQL, Hibernate (JPA)

PROJECTS

Learning Management System (LMS) View Project *3 WEEKS*

- Built a production grade LMS backend using Spring Boot and Spring Security.
- Implemented JWT-based authentication with Admin, Teacher, and Student roles.
- Designed REST APIs for course management, enrollment, lectures, assignments, submissions, and grading.
- Enforced service layer authorization, ownership validation, and enrollment-based access control.
- Implemented layered architecture (Controller-Service-Repository) with DTO based request/response handling.
- Used Hibernate (JPA) with MySQL for persistent storage.
- Prevented unauthorized data access and ensured strict data isolation across roles.

Tech Stack: Java, Spring Boot, Spring Security, JWT, JPA, PostgreSQL, Maven

URL Shortener View Project *2 WEEKS*

- Developed a URL Shortener system using Spring Boot REST APIs and React frontend.
- Implemented JWT authentication and secure URL ownership validation.
- Built short-code based redirection system with high-performance routing.
- Designed click analytics and statistics tracking.
- Supported custom domains and subdomains.
- Integrated PostgreSQL (Neon) and deployed backend on Render.

Tech Stack: Java, Spring Boot, Spring Security, PostgreSQL, React, Docker

AI Research Assistant View Project *3 WEEKS*

- Built an AI powered chat and search platform using FastAPI and Flutter.
- Implemented real time response streaming via WebSockets.
- Integrated Gemini LLM, web search, and YouTube data sources.
- Used Supabase authentication and designed responsive UI for web and mobile.

Tech Stack: FastAPI, Python, WebSockets, Flutter, Supabase, Gemini API

EDUCATION

Bachelor of Technology in Computer Science (AI & Robotics)- 3rd Year *2023-2027*
Vellore Institute Of Technology, Chennai, India

- CGPA: **8.82/10**

Higher Secondary Education *2020-2022*
PKMMHSS Edarikode, Malappuram, Kerala, India

- Percentage: **97.9%**

CERTIFICATIONS

Cybersecurity Analyst View Certificate *JUNE 2025*

- Issued by IBM Career Education Program
- Successfully completed a cybersecurity analyst certification powered by the IBM Developer Skills Network. Covered core topics including threat analysis, incident response, and vulnerability management.
